## **Slip On Exhaust Instructions**

hmfracing.com/exhausts/polaris/ranger-800-xp-efi/slip-on-installation

## Removal

- 1. Make sure the bike is on level ground and **completely** cooled down.
- 2. Remove the spings that hold the **Silencer** and **Head Pipe** together. (Use spring puller or piece of wire to remove springs)
- 3. Pull back and twist the **Silencer** until it is removed.
- 4. Keep the Stock Gasket, you will reuse it. You may need to replace it depending its condition.

## Installation

1. Slide the **Silencer** onto the Head Pipe and into the rubber mounts.

- 2. Mount the **Silencer** with the supplied springs.
- 3. With most applications remapping is a necessity.

## Hardware

.

(1) Spark Arrestor - Standard

(2) Spring(s) - Long Neck
