

Slip On Exhaust Instructions

 hmfracing.com/exhausts/polaris/ranger-800-xp-efi/slip-on-installation

Removal

1. Make sure the bike is on level ground and **completely** cooled down.
2. Remove the springs that hold the **Silencer** and **Head Pipe** together. (*Use spring puller or piece of wire to remove springs*)
3. Pull back and twist the **Silencer** until it is removed.
4. Keep the **Stock Gasket**, you will reuse it. You may need to replace it depending its condition.

Installation

1. Slide the **Silencer** onto the Head Pipe and into the rubber mounts.

2. Mount the **Silencer** with the supplied springs.
3. With most applications remapping is a necessity.

Hardware

-  (1) Spark Arrestor - Standard
-  (2) Spring(s) - Long Neck
