

RZR PRO XP SECONDARY BUTTER SHIFT WASHERS

Thanks for purchasing your Butter Shift secondary washers from AA! These washers are designed for the P90X secondary clutch found on Polaris Pro XP, 2021+ RZR Turbo models, Ranger models and others. These Butter Shift washers are meant to prevent spring binding for smoother shifts, and less clutch harmonics. They also add a bit of spring tension, normally 10-15lbs on the finish rate of a spring. This helps prevent clutch slip in most cases. Installation is easy, see the images below and refer to the video link and/or AA clutch setup for further clutch assembly or disassembly procedures.

If you need help disassembling or assembling clutches, see this video: https://www.youtube.com/watch?v=C5-x_rX_MdY

Stack washers and drop them into the helix. Next, install your spring and assemble the clutch according to our kit instructions.
